SUMMARY

Pre-final year B.Tech Information Technology student passionate about building scalable backend systems and AI-powered applications. I have hands-on experience with Django, FastAPI, PostgreSQL, and React.js, and have worked on projects involving RAG, semantic search, NLP, and recommendation systems. I am seeking Software Engineering, Backend Development, Machine Learning, or AI internship opportunities where I can apply my skills and continue learning.

EDUCATION

B.Tech — Information Technology, SGSITS Indore (RGPV)

Expected May 2027

CGPA: **7.95/10** | Class XII: 84% | Class X: 86.4%

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, SQL, C
Backend	Django, FastAPI, Flask, REST APIs, JWT, RBAC, Microservices
Frontend	React.js, Tailwind CSS, HTML5, CSS3
Databases	PostgreSQL, MySQL, Redis
AI / ML	Machine Learning, Deep Learning, NLP, RAG, Generative AI, Prompt Engineering, Semantic Search, Vector Embeddings, Recommendation Systems, FAISS, SentenceTransformers, PyTorch, scikit-learn, Pandas, NumPy
DevOps	Docker, GitHub Actions, CI/CD, AWS (EC2, S3, RDS), Linux
Tools	Git, Postman, Swagger UI, Pytest, Streamlit
CS Core	DSA, OOP, System Design, Computer Network, Database Management System

EXPERIENCE

IT Intern — Labour Department, District Court Indore

Jan 2026 – April 2026

Government of Madhya Pradesh

- Built the **SRAM** platform backend (Django + PostgreSQL) with a modular schema for workforce registration, job postings, and activity tracking across 3 user roles.
- Implemented **RBAC** with JWT authentication, automated reporting pipelines reducing manual effort by ~40%, authored full deployment documentation.

Full Stack Developer Intern

May 2025 – Jul 2025

BoltLabs

- Engineered a production platform with **React.js + FastAPI**; built an admin panel with approval workflows and dynamic task assignment for 50+ concurrent users.
- Designed **RESTful APIs** documented via Swagger UI, delivered features across agile sprints with iterative code reviews.

PROJECTS

Repo-Veda — AI GitHub Repository Recommendation Platform

Tech Stack: React.js | FastAPI | FAISS | SentenceTransformers | GitHub API

- Built an AI recommendation engine surfacing relevant GitHub repos from user skill profiles using **semantic search**, **vector embeddings**, and FAISS similarity search.
- Developed a FastAPI backend integrating the GitHub API for metadata ingestion and a React.js dashboard with dynamic filtering and ML-based relevance ranking.

DocuMind — AI PDF Chatbot (RAG System)

Tech Stack: FastAPI | FAISS | SentenceTransformers | FLAN-T5 | React.js

- Architected an end-to-end **RAG pipeline** over PDF corpora using FAISS vector indexing and dense retrieval via SentenceTransformers for sub-second semantic search.
- Integrated FLAN-T5 with structured **prompt engineering** for grounded responses, deployed via FastAPI + React.js frontend.

YojnaSathi — Government Scheme Recommendation Engine

Tech Stack: FastAPI | PostgreSQL | JWT | Rule-Based ML

- Built a FastAPI backend with **JWT auth** and PostgreSQL, designed a rule-based eligibility engine with weighted scoring to match users with relevant government schemes.
- Applied modular service-layer architecture enabling extensibility across data sources with minimal coupling.

LEADERSHIP

Executive Member — Entrepreneurship Cell

1 Year

Coordinated 3 college events with **200+ participants**, managed logistics, speaker coordination, and cross-functional team collaboration.
